Subject: 8:40 AM meeting question

Hi Richard –

From the 8:40 AM meeting:

- Question re the # of sites with potential VI issues. Mike S is going to have Linda do a search on sites with vapor-forming contaminants but I was wondering if we had tracked the # of sites with VI issues thru the FYRs. I don't recall ever hearing about such a tally but thought I'd ask.
- Gold King mine spill – some discussion on this – got a TASC contract set up yesterday to provide CI support, issues re sediments, questions re lab capacity/turn-around, potential liability, etc.

Very quiet here.....

Have a good day! Anne
